

What's new in Autodesk Topobase 2010

For those of you who are already using Topobase, you will continue to be impressed by the quality and performance of this new release and benefit from the new features.

Autodesk Topobase provides innovative technology that integrates infrastructure design and management, providing easy access to design, spatial, and asset information throughout the organization. With focused vertical offerings for Water, Wastewater, Gas and Electric industries and a robust framework for developing new vertical offerings, it allows utilities, transportation agencies, government, and telecommunications organizations to manage infrastructure information, optimize capital and operational costs, more efficiently utilize resources, and to ensure continuous service to stakeholders.

The 2010 product introduces a number of significant enhancements that will help maximize our users' investment in their infrastructure asset data and improve their ability to manage the infrastructure model.

AUTODESK TOPOBASE CLIENT 2010

Highlights include:

- Built on AutoCAD 2010 and AutoCAD Map 3D 2010
- Extended user management and control
